

# Technology Asset Inventory Extract

Asset inventory report | INV-TECH-2026-Q2

|                      |                                     |
|----------------------|-------------------------------------|
| Document owner       | IT Operations                       |
| Effective date       | 2026-06-30                          |
| Applicable reference | Annex A.8.5 - Secure authentication |

## Inventory summary

The Q2 inventory contains 212 laptops, 31 servers, 14 network appliances, and 9 managed SaaS applications. Records include asset tag, assigned team, location, operating system, and lifecycle state.

## Lifecycle notes

Twenty-three laptops are due for refresh in the next two quarters. The infrastructure team is reconciling three duplicate asset tags and two devices with an unknown custodian.

## Reconciliation

The inventory was exported from the endpoint management platform on 30 June 2026 and reviewed by IT Operations. Authentication configuration, factor enrollment, login procedures, and service-account controls are not recorded in this report.
