

Facility Badge Access Log Review

Physical-security report | RPT-FAC-ACCESS-2026-Q2

Document owner	Facilities Security
Effective date	2026-06-30
Applicable reference	PCI-DSS v4.0 Req 10.2 - Audit logs capture user activities and security events

Review period

Facilities Security reviewed badge entries to the two offices and the data-center lobby for April through June 2026. The review compared employee badges, temporary visitor badges, and the visitor sign-in register.

Exceptions

Four visitor badges were returned after the expected departure time. One employee badge was disabled after a lost-badge report. Facilities notified the relevant managers and closed the tickets.

Scope note

This report records physical entry activity only. It does not cover system-component access, cardholder-data access, user authentication, administrator actions, audit-event generation, SIEM ingestion, or security-event alerting.
